MOBILE LOCKER.EU®
YOUR HI-TECH LOCKER SOLUTION

PLUG AND PLAY

All locker units are delivered ready-to-go

Through an easy click-on system they are smoothly installed.
Software is preconfigured ready-to-go but can be adapted to your needs.

MODULAR LOCKER SYSTEM

The design of the lockers is set up in a way that it is easy adaptable to match our clients' demands, or to expand the amount of lockers. The maintenance of the units is low because of its ingenious design. All the hardware elements are "hot "swappable.

SMART, FLEXIBLE & SAFE

Safety in storage and lockers are priority number one. Therefore, Mobile Locker has designed and produced locker solutions that match all the existing safety standards and needs.

Our **smart** lockers are ready for the 21st century. Fully IoT devices (Internet of Things) encrypted & connected to a cloud platform. This online tool allows operators to remotely track, follow and service the lockers.

The software enables us to be **flexible** towards any "ecosystem" such as an airport. We can easily adapt the user interface and are open to 3rd party integrations.

- · High safety standards
- · Integration friendly
- · State of the art and encrypted software

SMART URBAN KIOSK IN A SMART AIRPORT

Do you wish to lift your airport into the 21st century?
Mobile Locker has innovation in its DNA. Together we create the modern and premium user experience for your customer.

First of all, we have developed a smart kiosk that serves as a functional and save way to store valuables.

Easy to use for the consumer, smooth to service for the operator and transparent to track for the owner.

Secondly we have connected a range of services to increase the value proposition of a locker and decrease management costs of your airport.

MARKETING AND INFORMATION POSSIBILITIES

The locker units create a strategically interesting **marketing and information potential** which will increase the revenue of the occupied space.

SERVICES:

- Safe storage of luggage for transit passengers
- Unauthorised entry alert (sms or email)
- Voucher and reservation system
- Charging of electronic devices inside the locker
- Integration of app's through API (rest 2.0)

OTHER OPTIONS INCLUDE:

- Automatization of Lost and Found
- Power bank rental in the locker kiosk (option)
- Integration of POS
- DOOH screens in combination with Audience Measurement (option)
- And much more...

WE BUILD A SOLUTION

Each airport has its own identity. Together we create **custom made solutions** according to your needs.
